

Payment security

You can pay for your order using bank cards of Visa and MasterCard payment systems.

Payment security is ensured with the help of acquiring banks, operating on the basis of modern protocols and technologies developed by the payment systems MIR, Visa International and Mastercard Worldwide (3D-Secure: Verified by VISA, Mastercard SecureCode, MirAccept). Processing of the received confidential data of the Cardholder is carried out at the Bank's processing center certified according to the PCI DSS standard. The security of transmitted information is ensured using modern Internet security protocols.
